Professional Summary

Software Engineer with 2+ years of experience at Mercedes-Benz Research & Development, with a track record of identifying operational friction, defining solutions, and shipping production-ready systems at enterprise scale. Experienced in API governance, developer tooling, secrets management infrastructure, and cross-functional collaboration across engineering, security, and platform teams. Passionate about building platforms and internal tools that make the right way to build also the fastest way — with a growing focus on AI-assisted workflows and developer experience. Seeking to transition into product management, bringing an engineer's understanding of systems with a product mindset focused on measurable business outcomes.

Experience

Software Developer | Mercedes-Benz Research & Development

Aug 2023 – Present

Bangalore, Karnataka

- Acted as de facto product owner for an RPA-based MFA authentication platform — identified the problem, defined the solution, collaborated with security and infrastructure teams, and drove it to a successful enterprise-scale pilot with one of Mercedes-Benz R&D's largest internal user groups.
- Defined and implemented API governance standards for Bot User lifecycle management (creation, modification, deletion) — establishing repeatable, automated workflows that replaced manual, error-prone processes and reduced operational overhead at scale.
- Partnered with platform and DevOps engineers across the full development lifecycle to deliver new infrastructure components for a flagship product — translating technical requirements into shipped solutions without lengthy approval cycles.
- Integrated developer workflows with HashiCorp Vault to enforce secrets management and token-based access control across microservices — improving security posture while maintaining developer velocity.
- Developed and maintained internal tooling, automation scripts, and front-end interfaces that measurably improved developer productivity and reduced time-to-productivity for new workflows.

Front-End Developer Intern | Varcons Technologies Pvt. Ltd

Feb 2023 – Mar 2023

Bangalore, Karnataka

- Delivered front-end features for a client-facing web application using React.js, JavaScript, HTML5, and CSS3, collaborating in an Agile team across design, build, and review cycles.
- Contributed to team best practices through Git-based code reviews and collaborative task management.

Projects

Meals Prep App | Flutter, Dart

Jan 2022

- Scoped, prioritised, and shipped a cross-platform (iOS & Android) mobile application end-to-end — owning the full product lifecycle from requirements to deployment independently.

Weekly Transaction Tracker | Flutter, Dart

Mar 2022

- Identified a user pain point, defined success metrics, and built a personal finance tracker with data visualisation — demonstrating product thinking applied to a real problem.

TinDog | HTML, CSS, Bootstrap

Dec 2021

- Designed and shipped a fully responsive, mobile-first landing page — translating design requirements into production-ready code rapidly.

Education

Bachelor of Engineering — Information Science | SJB Institute of Technology

Sep 2019 – May 2023

Bangalore, Karnataka

- Relevant Coursework: Data Structures, Algorithms, Web Development, Cyber Security

Technical Skills

Product & Platform	: API Governance, Developer Tooling, Internal Platforms, Agile/Scrum, Cross-functional Collaboration
Languages	: Python, TypeScript, JavaScript, SQL, Dart, C++, C
Frontend	: React.js, Flutter, HTML5, CSS3, Bootstrap
Backend & APIs	: Node.js, REST APIs, API Automation, Microservices, HashiCorp Vault
AI & Dev Tools	: Claude, GitHub Copilot, Cursor, ChatGPT, Power Automate, Git, CI/CD Pipelines
